26 Jan 2013 - 3 min - Uploaded by EyeOnAiman(Also Works with Soul Silver) STEPS TO FIX FREEZE GLITCH: (Fair Use & posted with .

21 Jul 2010 - 3 min - Uploaded by LvFun Mulyiplayer Games Link This is How to save pokemon .

I using No\$gba for playing some pokemon fine except working on PC inside Pokemon . Desmume runs Platinum and SoulSilver without any problems. . I couldn't even manage to get the Desmume download to work. . dude it's the only GBA emulator that made the full transition from GBA emulator to DS.

Just download it from there and as far as i know Soul silver is my upload so its sure to work!! . when I open my soul silver rom in no\$gba all that happens is their is a a blue screen . That kind of freezing happens to all of us its just some kind of bug. .

help: specs for DSi RTC extras (up counter, alarm date, and FOUT selection) . In the late 90s most of us didn't have gameboys, but we used this . I'm glad that NO\$GBA is still alive, I relly am, but with each new . For example, in this v2.9 the freezes in Pokmon HeartGold/SoulSilver are still present. Not.
